

Ali Nasir

Technical Business Analyst

✉ alinasirdawood99@gmail.com  AliNasirDawood

PROFESSIONAL SUMMARY

Versatile Business Analyst with extensive experience designing and delivering end-to-end IT solutions within the **UK Energy Market** and customer business sectors. I have managed complex **technological developments** through **Agile methodologies** while effectively leading communication with vendors and diverse stakeholders. I am eager to contribute to **Scottish Power's** fast-paced environment by delivering seamless technological upgrades to secure customer satisfaction.

KEY SKILLS

Programming Languages

Python, SQL

Data Visualisation

Power BI, Streamlit

Machine Learning

TensorFlow, Scikit-learn, Keras

Generative AI

Lang Chain, Chat GPT, Hugging Face

ETL Tools

PySpark

Cloud Technologies

Azure Databricks, Azure Active Directory

Project Management

ClickUp, Trello, Azure

EXPERIENCE

PwC

01/2026 – Present | Karachi, Pakistan

AI Engineer

- Led the delivery of the Customer Complaints application from design to deployment, reducing resolution time by 70%
- Perform root cause analysis of customer retention through a Power BI dashboard, reducing churn status by 85%
- Led end-to-end delivery of an **MS PowerApp** for customer complaints, from design to deployment, including **API integrations**, reducing resolution time by 70%, improving system performance
-

SSE plc

03/2025 – 08/2025 | Glasgow, Pakistan

Data Scientist (Research Dissertation)

- Implement a data architecture to monitor 4 years of turbine data to analyse site and turbine behaviour across multiple wind farms in Scotland.
- Designed data infrastructure on Azure Databricks using PySpark to ingest and process 40M+ records/month from 75 turbines, achieving 92.8% high-quality data accuracy
- Applied a machine learning algorithm, i.e. LSTM model with attention mechanisms for short-term wind power forecasting, achieving an RMSE of 0.015, outperforming baseline models by 20%
- Led bi-weekly sprints with both technical and non-technical stakeholders, incorporating feedback to refine deliverables, achieving a 25% reduction in post-sprint revisions

EDUCATION

University of Strathclyde

2024 – 2025 | Glasgow, UK

MSc in Advanced Computer Science with Data (Distinction)

- Core Modules: Business Analytics, Machine Learning for Data Analytics, Advanced Software Engineering

University of Karachi

2018 – 2021 | Karachi, Pakistan

BS in Software Engineering (Distinction)

- Core Modules: Relational Database Management System (RDBMS), Artificial Intelligence, Software Project Management

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Strath Inspire Entrepreneur

University of Strathclyde

- Led the development of a decentralised energy platform, empowering local communities to store and trade surplus solar energy, accelerating global decarbonization efforts

Research Analyst

PILLS

- Volunteered with PILL on a women's mental health research project, coordinating participants and clinicians to provide access to mental health.
- Volunteered on a PILL project addressing paternal postpartum depression, providing first-line support to patients and collaborating to improve referral and follow-up processes.

LANGUAGES:

English
